Kitchen & Wardrobe

ENHANCE YOUR HOME WITH OUR STYLISH FUNCTIONAL KITCHEN AND WARDROBE SOLUTIONS!

Step into a world of boundless possibilities with Finemake – backed by Pidilite Ventures, providing impeccable quality & lightning-fast delivery, all seamlessly tailored to your distinctive lifestyle.

We seamlessly blend design prowess with cutting-edge technology to craft modular marvels that transcend traditional boundaries. Through meticulous planning, precise engineering, and a relentless pursuit of perfection, we transform raw materials into modular structures that are not only functional but also aesthetically stunning. With our unwavering commitment to quality and creativity, we are revolutionizing the world of modular structures, one transformative creation at a time.

At the forefront of innovation, we embrace technology to revolutionize your experience. Our state-of-the-art facility propels us towards hassle-free operations, guaranteeing pinpoint precision and flawless execution.

But our journey does not end with the completion of a project. *We believe in the power of lasting relationships and strive to build connections that endure beyond creation. We are here to listen, collaborate, and bring to life the visions of those who dare to dream big.*

Our Story

UNLEASHING THE POWER OF CREATION

expertise IN

MANUFACTURING

- Top-of-the-line machinery from Germany & Italy.
- Manufactured accurately to 200th of a millimeter.
- Scalability for Large Volume Orders.

ASSEMBLY

- Integrating components for functional & beautiful kitchen and wardrobes.
- 21-Step Quality Check before dispatch.
- QC Pictures are sent to customer before dispatch to ensure product completion.

TECHNOLOGY

- Advanced EPR Systems for streamlined supply chain management.
- Real-time status updates in the order fulfillment process.
- Sophisticated inventory and material management, ensuring stock for faster delivery.

INVENTORY

- Fully prototyped kitchen and wardrobe modules adhering to interior design standards.
- Detailed cut lists guarantee precise fabrication of modular structures.
- Design consistency incorporating high quality materials, finishes, and hardware.

Core Materials

BUILD TO LAST

Birch PLY

The wood veneer offers a unique blend of beauty and durability. It's crafted by combining birch plywood with a thin layer of birch veneer, resulting in a material that is both visually appealing and structurally sound.

-  Smooth & consistent surface
-  Highly Durable
-  Moisture Resistance

BWP Plywood

Ideal for Indian kitchens due to their exceptional water resistance and durability in varying climate conditions .

-  Boiling Water Proof Upto 72 Hours
-  Exceptionally sturdy
-  Termite Resistance

BWR Plywood

BWR Plywood, being more cost effective yet only slightly less water resistant compared to BWP Plywood offers a valuable alternative for Indian kitchens

-  Boiling Water Resistance Upto 48 Hours
-  Exceptionally sturdy
-  Termite Resistance
-  All Weather Usage

MR Plywood

Ideally used for wardrobe carcass, as it offers a balance between cost-effectiveness and resistance to moderate levels of moisture.

-  Boiling Water Resistance Upto 6 Hours
-  Cost Effective
-  Termite Resistance
-  All Weather Usage

HDHMR

HDHMR (High Density High Moisture Resistance) board, with its superior density and moisture resistance exhibits exceptional dimensional stability, ensuring minimal warping or bending, even under fluctuating environmental conditions.

-  Fairly Water Proof
-  Fungus Resistance
-  Termite Resistance
-  All Weather Usage

HDF

Smooth finish that caters to diverse aesthetic preferences, and relatively good resistance to humidity, making it suitable for the varying climate conditions across India

-  Smooth & consistent surface
-  Highly Durable
-  Moisture Resistance

Block Board

A core material renowned for its dimensional stability, strength, and versatility, consists of a solid wood core encased by two layers of plywood.

Smooth & consistent surface

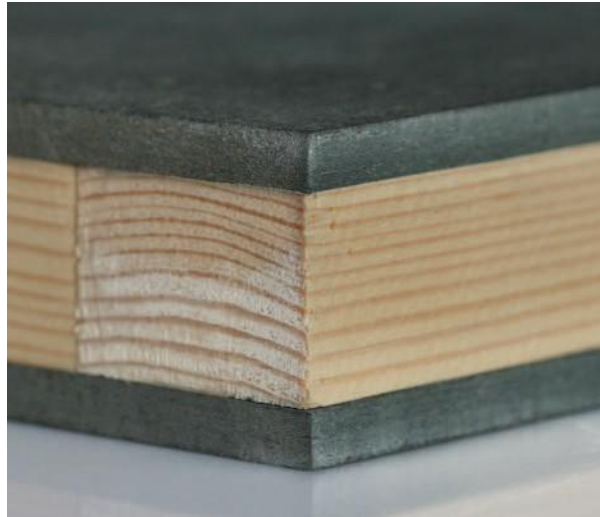

Highly durable

Bend resistance

Honeycomb Board

Honeycomb board with HDHMR outer skins and a craft paper core is a versatile and durable material that offers a combination of lightweight strength and weather resistance.

Light weight

Smooth and consistent surface

All Weather Usage

MDF

A cost-effective option for a wide range of aesthetic preferences and budgets, but has a notable drawback in terms of moisture resistance.

Smooth & consistent surface

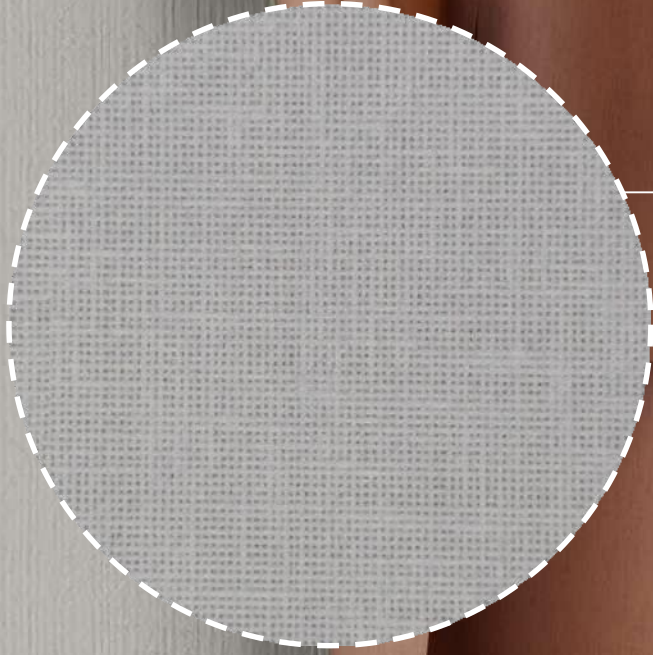

Easy to carve and mold

Termite Resistance

Welcome to the **KITCHEN**

The Fine Kitchen Concept is an approach for efficient workflows that reduces unnecessary movement in the kitchen by creating an organized and functional environment. The fine kitchen concept splits the kitchen into five clear zones: cooking, food preparation, consumables, non-consumables, and cleaning. The cooking zone has the stove and oven. The food preparation area is for cutting and mixing ingredients. The consumables section is for items like fruits and vegetables, usually near the fridge. The non-consumables area is for storing pots, pans, and plates. The cleaning zone has the sink and dishwasher. This layout makes the kitchen easy to use and keeps it tidy. It also makes cooking more fun and hassle-free.

Food Preparation

Cooking Zone

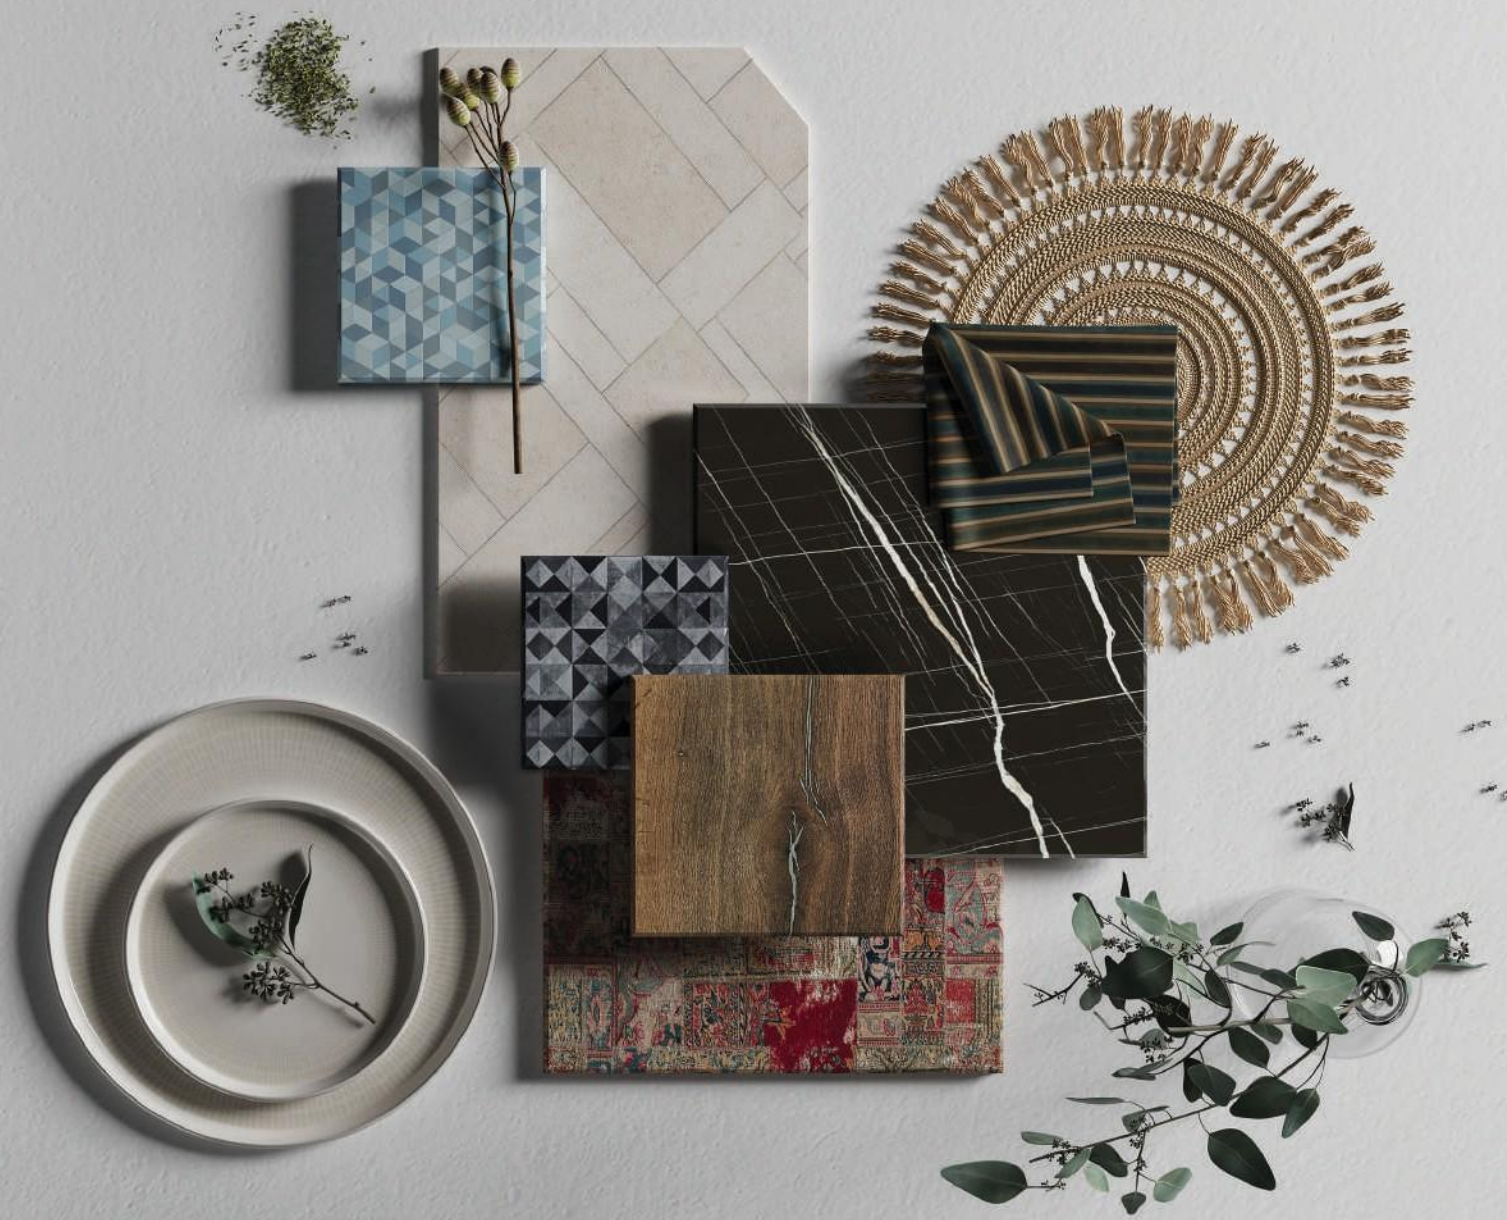

The accompanying illustrations showcase the Fine Kitchen Concept across six kitchen shapes. The L-Shape is a classic, utilizing two walls for a balance of workspace and movement. The U-Shape envelops the user with counters on three sides, creating an abundant workspace ideal for multitasking. The Galley, streamlined and linear, efficiently serves narrow spaces. The G-Shape adds an extra section of counter that's versatile for hosting appliances or additional prep space. The Island layout includes a central counter, ideal for both food preparation and social interaction. The One-Counter layout exemplifies simplicity, optimized for compact spaces. Each layout is meticulously designed to optimize workflow and judiciously utilize space.

kitchen MODULES

The concept of kitchen modules represents a significant innovation in kitchen design, offering a standardized approach to the sizes of kitchen cabinets. By producing cabinets in bulk at standard sizes, supply and delivery to site is faster thus allowing a project to be completed in a quicker time and competitive pricing, we offer the best value for your money. Trust us to be your reliable partner in creating your dream kitchen.

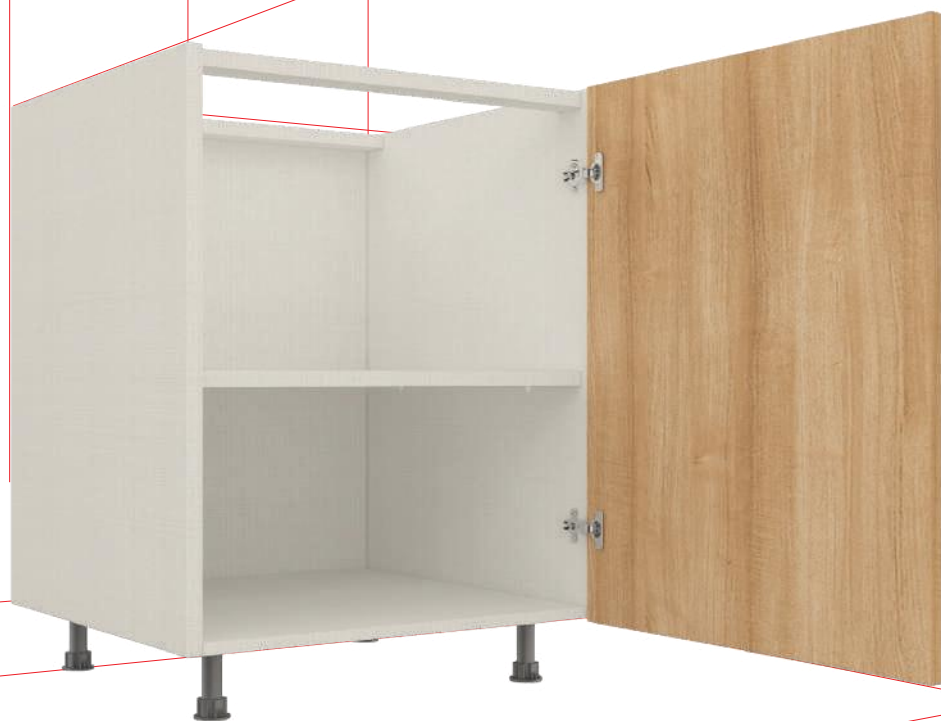

Base Units

Kitchen base units are the cornerstone of a well-designed kitchen. These functional and sturdy cabinets rest on the floor and usually support the countertops. Their grounded nature means they're the workhorses of the kitchen, providing ample storage for utensils, cookware, and non-perishable items.

Wall Units

Wall units are an integral component of kitchen design, offering valuable storage space while contributing to the overall aesthetics of the space. Mounted on the wall above the countertops, these units are ideal for storing items that need to be within easy reach, such as dishes, glasses, and spices. Incorporating features such as under-cabinet lighting can enhance functionality, illuminating the workspace below. Additionally, wall units can be fitted with various organizers and accessories, like plate racks and spice holders, to improve organization and convenience.

Lofts

The kitchen loft frame and shutter are essential elements that maximize storage capacity by utilizing the often underused space near the ceiling. The loft frame, being the skeletal structure, provides the necessary space for placing large items the loft storage area. One of the primary advantages of kitchen lofts is their ability to house items that are not frequently used, such as seasonal cookware, preserving the lower areas for daily necessities.

Filler

Fillers are indispensable components in kitchen cabinetry, particularly when it comes to addressing the challenges posed by corners and walls that are not perfectly perpendicular. They are essentially narrow pieces of material that are used to close small gaps between cabinets or between a cabinet and a wall. When cabinets are installed in a corner, the doors often have hinges that allow them to open to a 95-degree angle or more. Without a filler, the door of one cabinet can collide with the adjacent cabinet or its handle, causing damage over time. In cases where walls are not perfectly straight or perpendicular, filler panels can be a saving grace.

Legs

Kitchen PVC legs, available in 100mm and 150mm adjustable heights, offers considerable versatility. The 100mm option is ideal for standard installations. The 150mm variant, being taller, offers additional space which can be advantageous for accommodating under-cabinet appliances or for customizing the working height of the countertops.

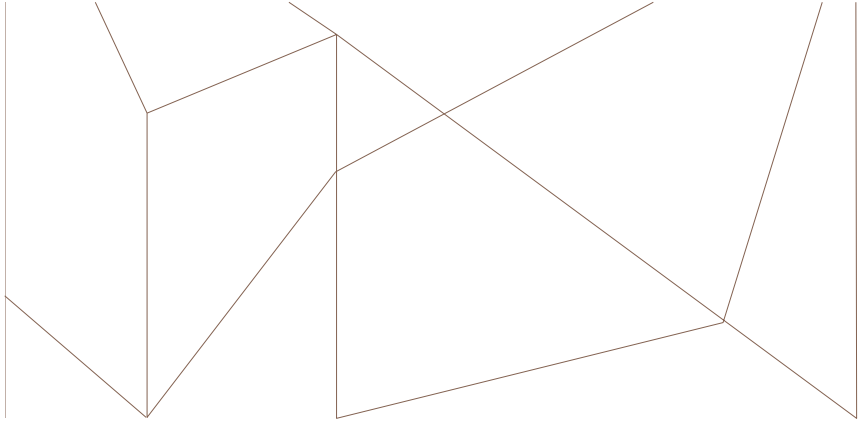

Skirting

Kitchen skirting is a finishing detail that runs along the base of kitchen cabinets. It serves both functional and aesthetic purposes. Functionally, kitchen skirting conceals the legs of the cabinets and creates a barrier to prevent dust, debris, and moisture from accumulating underneath. Aesthetically, kitchen skirting provides a polished and cohesive look to the cabinetry.

Step into the
WARDROBE

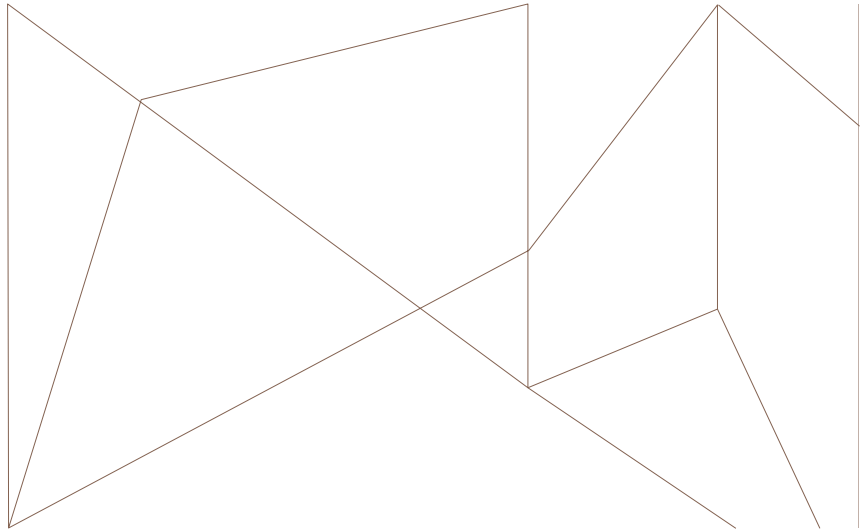

Swing Doors

Swing door wardrobes, also known as hinged door wardrobes, are a classic and ever-popular choice in wardrobe design. With doors that open outward on hinges, these wardrobes offer easy access to the full expanse of the storage space. They are perfect for spacious rooms where the doors can swing open without obstructing walkways or other furniture.

Sliding Doors

Sliding door wardrobes are an ideal solution for modern homes, especially those looking to optimize space and enhance aesthetic appeal. Combining practicality with elegance, these wardrobes offer a sophisticated and streamlined approach to bedroom storage. One of the main advantages of sliding door wardrobes is their space-saving design. Unlike traditional hinged doors, sliding doors do not require additional room to open, making them an excellent choice for smaller bedrooms or compact spaces.

Walk-in

A walk-in wardrobe is a dedicated space that offers a luxurious solution for clothing and accessory storage, and is often considered a sign of opulence in a home. It's not just a closet, but a personal dressing area that elevates the process of dressing up and storing clothes to a whole new level. Walk-in wardrobes are also highly customizable to suit individual needs and preferences. The layout, fittings, lighting, and even the color scheme can be tailored to create a highly personal space that reflects your style.

Wardrobe without Loft

Wardrobe with Loft

In India, a common practice in wardrobe design for certain finishes is to limit the height of wardrobe shutters to 7ft. The reasoning behind this standard is largely practical and pertains to the material properties of the shutters. When wardrobe shutters exceed this height, they tend to be more susceptible to warping or bending over time, especially in conditions of high humidity or temperature fluctuations. However, this does not mean that the space above 7ft is left unused. In many Indian homes, this area is optimally utilized by installing lofts. Lofts provide additional storage space, ideal for stashing away items that are not regularly used, such as luggage, seasonal clothing, or spare linens.

Wardrobes shutter finishes that allow up to 9ft in height are a stunning way to maximize storage and create a visually striking feature in any bedroom or dressing room. Whether it's a sleek, modern design or a classic, traditional style, a 9ft wardrobe can be a focal point in the space. This allows for optimal organization, making the most out of every inch of space.

Wardrobe 9ft Finishes

Somebody says that you will make
right now. I've been
looking at the landscape, people
around me, and I don't
know what I'm doing. I don't
know what I'm doing for a while.
So I don't know. Because
I don't know. I don't know.
Let your work and all of it
around you. I don't know.
Because, but maybe all

REGALE

This aluminium profile incorporates the advanced Sleek Sliding System. Its smooth and efficient operation meets high standards of functionality, making it a versatile choice for contemporary architectural designs.

Side Profile

NIMBUS

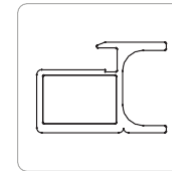

Designed to accommodate varying door weights determined by hinges, these aluminium profiles are compatible with 5mm glass. With a generous capacity for doors up to 3000mm in height and 600mm in width, these profiles offer versatility and style.

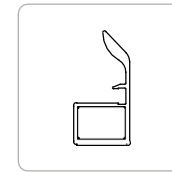

Side Profile

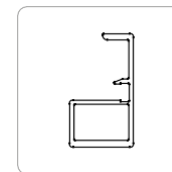

Handle Profile

Handle Profile

Handle Profile (left) (Handle Size 100 mm)

Handle Profile (left) (Handle Size 200 mm)

A large, floor-to-ceiling wardrobe system with four glass doors and gold-colored frames. The interior is illuminated with warm, recessed lighting. The top section features hanging rods with four white jackets. Below the hanging area are white drawers and open shelving compartments. The wardrobe is set against a dark wood wall.

A wooden shelving unit with three shelves. The top shelf holds a white hand sculpture and a stack of books. The middle shelf holds a stack of books, including one titled "ARCHITECTURE". The bottom shelf holds a small brown teddy bear figurine and a stack of books. The unit is set against a dark wood wall.

A modern, cylindrical black lamp with a gold-colored base. The lamp is positioned on a bedside table next to a bed. The table also holds a small brown teddy bear figurine and a stack of books.

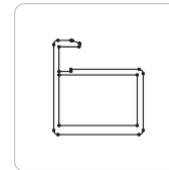

A small, round, light-colored wooden table with a glass of water and a book on it. The table is positioned in the foreground, next to a bed.

A bed with a white sheet and a grey blanket. A patterned throw blanket is draped over the bed. The bed is positioned in the foreground, next to a bedside table.

TITANIZE

A robust design capable of supporting door weights of up to 50 kg and accommodating 5mm thick glass. Perfectly tailored for pin hinges, these profiles allow for doors up to 3000mm in height and 600mm in width, ensuring both durability and style. Experience maximum flexibility with a wide door opening angle of up to 270°, making them the perfect choice for modern architectural projects.
